

Mount Sinai Fertility Referral Instructions

Please note: As of July 1, 2017, we have implemented a number of changes to our referral process to improve our turnaround time in booking your patients appointment.

Instructions for Use:

- Before you send a referral to us, you will need the following information:
 - Referring Physician OHIP billing number, phone number and fax number
 - As per patient's updated health card: name, DOB, HC# (with valid version code), address, primary phone number
 - As per partner's updated health card: name, DOB, HC# (with valid version code), address, primary phone number. If not applicable, please indicate this by checking off the N/A Box
- Oncology referrals are treated as urgent
- Our referral form can be accessed at: <http://mountsinaifertility.com/wp-content/uploads/2015/01/PATIENT-REFERRAL-June-2017.pdf>
- We have six physicians that can be referred to at Mount Sinai Fertility. If there is no preference, the first available option can be selected and the patient will be assigned by the first available appointment date
- Mount Sinai Fertility has three locations so a note can be made if a patient prefers either the Downtown, North York, or Vaughan location

*Please note: if you do not send the required information, your patient will not be booked an appointment until all mandatory information is received.
